APPENDIX E-185 V

DEMAND HISTORY MAINTENANCE VIOLATIONS

1. INPUT DOCUMENT

   Appendix B-185, Demand History Maintenance Document, DIC ZRZ.

2. INPUT TO PROCEDURE DECISION CHART

   None.

3. PURPOSE, CONTENTS AND RESPONSIBILITIES

   This appendix is applicable to chapters 52 and 57 and provides
instructions for the research, correction, and reentry of Demand History
Maintenance Documents, DIC ZRZ, which have been rejected from computer
processing. Reasons for computer rejection by VRC, in alphabetical
order, are listed below. The IM, Commodity Branches, Inventory
Management Division, DSO, is responsible for processing these VRCs.

VIOLATION REASON CODES	DEFINITION
AS	Quantity Invalid or Blank.
AV	Service Code Invalid or Blank.
AY	NSN Invalid, Blank, or Unmatched.
CK	Type of Pack Invalid.
EA	Demand Code Invalid or Blank.
RE	Demand/Return Reversal/Reduction Does Not Match in Trailer.
R8	Stock Code Invalid or Blank.
SM	Negative Balance Would Result in Demand History File from an Adjustment.
SN	Adjustment in Demand History File Will Reduce Service/Location Demand by more than 50 Percent.
SQ	Frequency Code Field Invalid or Blank.
TM	Time Period Code Invalid or Blank.
T7	No Matching Supply Control Record.
UA	Storage Location Code Invalid or Blank.

```
VIOLATION
REASON CODES     DEFINITION

YH               Domestic/Overseas Requirement Code (Customer Zone Code)
                 Invalid or Blank.
```

4. PROCESSING/RESEARCH INSTRUCTIONS

  a. VRC AS.

    (1) REASON FOR VIOLATION/ERROR CONDITION

     Indicates that the quantity field, pos. 33-39, contains alphas, special characters, embedded blanks, or all blanks.

    (2) PROCESSING/RESEARCH REQUIRED

     Obtain the correct quantity for increase/decrease of recorded demands/returns from the source document causing the change. Quantity change will normally be recorded on the latest Standard Supply Control Study (appendix F-167) retained in the Item Jacket File of the NSN involved.

  b. VRC AV.

    (1) REASON FOR VIOLATION/ERROR CONDITION

     Indicates that the Service or MILSTRIP Conversion Code, pos. 30-31, is blank or other than those authorized by appendices A-20 and A-130.

    (2) PROCESSING/RESEARCH REQUIRED

     Obtain the correct Service or MILSTRIP Conversion Code for the action desired by review of appendices A-20 and A-130.

  c. VRC AY.

    (1) REASON FOR VIOLATION/ERROR CONDITION

     Indicates that the NSN, in pos. 8-20, does not match the NIR.

    (2) PROCESSING/RESEARCH REQUIRED

     Obtain the correct NSN for increase/decrease of recorded demands/ returns from the source document causing the change. This data element may normally be located in other work-in-progress (i.e., procurement recommendations, disposal recommendations, customer excess reviews, and so on) on the originating IM's desk.

  d. VRC CK.

    (1) REASON FOR VIOLATION/ERROR CONDITION

     Indicates that the Type Pack Code, pos. 22, is other than 1, 2, 3, or 4, or a valid blank, as authorized by appendix A-4.

(2) PROCESSING/RESEARCH REQUIRED

Obtain the correct Type Pack Code (Subsistence Items Only) for the increase/decrease of recorded demands/returns from the source document causing the change or from the latest Standard Supply Control Study, appendix F-167, retained in the Item Jacket File for the NSN involved.

e. VRC EA.

(1) REASON FOR VIOLATION/ERROR CONDITION

Indicates that the Demand Code, pos. 26, is other than I, R, N, S, P, or T as authorized by appendix A-6. Demand Code (alpha) O is not authorized for use on this document.

(2) PROCESSING/RESEARCH REQUIRED

Obtain the correct type of demand being adjusted from the source document causing the change or from annotations normally maintained in the Item Jacket File for the NSN involved.

f. VRC R8.

(1) REASON FOR VIOLATION/ERROR CONDITION

Indicates that the Stock Code, pos. 7, is not 1 (NSN). Code 2 (non-NSN) is not authorized as manual input.

(2) PROCESSING/RESEARCH REQUIRED

When pos. 8-20 contains a valid NSN, enter 1 in pos. 7 of the reentry document. When pos. 8-20 contains other than an NSN, reenter the violation output using Violation Reentry Code D (see appendix A-62) for deletion action.

g. VRC SQ.

(1) REASON FOR VIOLATION/ERROR CONDITION

Indicates that the Frequency Indicator, pos. 40-42, being adjusted is other than numerics; or in the case of a decrease, is other than numerics with an 11 overpunch in pos. 40.

(2) PROCESSING/RESEARCH REQUIRED

Obtain the correct frequency from the source document causing the change, or zero fill pos. 40-42 when no change to the recorded frequency is required.

h. VRC TM.

(1) REASON FOR VIOLATION/ERROR CONDITION

Indicates that the Period Code, pos. 43, is other than C, M, Q, or numerics 1 through 9 as authorized by appendix A-89.

(2) PROCESSING/RESEARCH REQUIRED

Obtain the correct time period involved in the increase/decrease of recorded demands/returns from the source document causing the change. Select the correct Time Period Code from appendix A-89.

  i. VRC T7.

(1) REASON FOR VIOLATION/ERROR CONDITION

Indicates that a Demand History Maintenance Document has been submitted for which there is no SCF record for this NSN. This violation is generated when the NSN is valid in the NIR, but is not in the SCF.

(2) PROCESSING/RESEARCH REQUIRED

(a) Processing personnel will ascertain if the correct NSN has been queried by referring to the data from which the keypunch source document was prepared.

(b) If the correct NSN was queried and that NSN is a Family Head/ Member, check the family relationship for inconsistencies, correct these inconsistencies, and reinput document.

(c) If the violation was caused by other than keypunch error or inconsistent family relationships, the T7 violation will be taken to the MSO, DSO, where research will be conducted as to why the item has an NIR but no SCF and the necessary corrective action will be taken.

  j. VRC UA.

(1) REASON FOR VIOLATION/ERROR CONDITION

Indicates that an attempt is being made to adjust a demand record at other than a Prime Distribution Depot, pos. 23-25, as identified by the Source Preference Table. For this input action, Prime Distribution Depots are defined as PDD (Code P), SSDs (Code S), and DSSPs (Code N).

(2) PROCESSING/RESEARCH REQUIRED

Determine the RIC of the depot involved from the source document causing the change to recorded demands/returns. When a typographical error on the input transaction is evident, effect corrective action for reentry. When the entry in pos. 23-25 is a prime distribution depot, it indicates an error has occurred in the Source Preference Table. Correction to the Source Preference Table is to be made as specified in appendix E-123 P. After correction the rejected input action may be reinput for processing.

  k. VRC YH.

(1) REASON FOR VIOLATION/ERROR CONDITION

Indicates that the Customer Zone Code, pos. 27, is blank or is other than 1 through 4 as authorized by appendix A-128.

      (2) PROCESSING/RESEARCH REQUIRED

        Obtain the correct Customer Zone Code from review of the source document causing the change to recorded demands/returns.

l. VRCs RE, SM, AND SN.

      (1) REASON FOR VIOLATION/ERROR CONDITION

        VRCs RE, SM, and SN are defined in paragraph 3 above.

      (2) PROCESSING/RESEARCH REQUIRED

        VRCs RE, SM, and SN will be processed in conjunction with the Demands/Returns History Listing, appendix F-191, IAW appendix E-319 P.

5. REENTRY INSTRUCTIONS

  a. Review remaining data elements contained in violation output to detect any other invalid data and correct as necessary.

  b. Reentry methods for violations are contingent upon type of violation output. Type of output is an option recorded in the ORC Table (see appendix F-20). Reentry instructions may be found in DLAH 4745.2, Volume I, Part 1, Chapter 3, Verb SVRR.

6. FLOWCHART

  Flowchart not required.
